**PROGRAM DESIGNS**

- 2003 – 2004 Principal author of High Risk Design Strategy; a high-intensity, ecologically based, multidisciplinary prevention intervention for children ages 0-5 in Santa Clara County, CA
- 2001 – present Designed and implemented nation's first Juvenile Mental Health Court. This model has been successfully disseminated nationwide of [Childrensprogram.org](http://Childrensprogram.org).
- 2000 – 2001 Designed a community based alternative for children institutionalized. Mode based on: Applied Systems Theory in Ecological Context (ASTECC). MATRIX © 2001.
- 1997 – 2001 Conceived and formally proposed the J-AID Program (Juvenile Alternatives to Institutionalization and Detention), a three county collaborative designed to provide the juvenile judiciary with community based alternatives for young offenders in a randomized field trial. This alternative to CYA included paid work experience (California Conservation Corp.) and high intensity human monitoring (High Touch Program). This 1997 Juvenile Justice Accountability Challenge Grant Proposal was ranked third in the state of California. I was a strategic advisor to Walter R. McDonald and Associates who were performing the evaluation component of this six million dollar project.
- 1995 – 2000 Conceived and implemented a diagnostic screening and follow-up protocol for children upon detention in juvenile hall utilizing structured self report, nursing and mental health structured clinical interviews, and modified DISC (Diagnostic Interview Schedule for Children) for differentiating ADHD from Bipolar Disorder.
- 1994 – 1996 Conceived and implemented a diagnostic, follow-up, and outcome monitoring protocol for children in residential treatment utilizing structured diagnostic assessment and follow-up instruments. Children are followed using quantifiable assays of symptom severity, which have been normed and validated.
